This project is a two story, 27,800 S.F. education addition to Evangel Temple's existing 1000 seat worship facility. The new addition boasts an enlarged secondary entrance and foyer with a unique café/bistro area highlighted by large expanses of exterior windows and ceiling treatments with specialty lighting to accentuate the character of the space. Adjacent to the café is a multipurpose fellowship foyer which, through the use of carefully designed operable walls, has the flexibility to expand and seat over 400 people for fellowship dining.

In this new addition, the basement level is designed for children grades K-5. A large centralized check-in area adjacent to the new lower level entrance allows for security and control while deterring congestion and providing a sense of openness. The sizable lounge/game room is accessible from both circulation corridors that connect the 12 new children's classrooms. This floor also includes a children's multipurpose auditorium, which provides flexibility in performance style with advanced audio/video capabilities.
