

## GRACE COMMUNITY CHURCH OF THE NAZARENE

The opportunity to reach out to the emerging community of Spring Hill, Kansas is one of the major motives for Grace Community Church of the Nazarene's desire to expand. As the city grows, the church hopes to grow as well. In order to plan wisely for this, the church brought Mantel Teter Architects on board to explore numerous development options. To identify the specific expansion needs of the church, Mantel Teter Architects conducted a Programming Workshop, where all the church ministry groups shared about their part in the common vision, and how they hope to see that vision represented in additional facilities.

After studying the possibilities of a fully developed campus on Highway 169, Mantel Teter Architects focused in on, and designed for, the church's immediate need for a dynamic dedicated worship space, which would function as a fellowship foyer for a future 600-seat sanctuary. This new building would also contain nurseries, to keep little ones nearby to families attending service. The existing facility on campus contains a multi-purpose room, classrooms, and

offices, and may continue to meet the church's education and administrative requirements. With schematic design concepts in hand, Grace Community Church of the Nazarene is excited about the advancement of their budding campus and, more importantly, boldly representing the inviting and lively church family they hope to grow.

### Client:

Grace Community Church of the Nazarene

### Location:

Spring Hill, Kansas

### Size:

9,895 S.F.

### Services Provided:

- Programming
- Master Planning
- Architectural
